Quality Policy

The Quality Policy has been developed by the senior management of Baku Engineering University (BEU) in accordance with the University's overall objectives, formalized in written form, and approved by the Rector.

The Quality Policy serves as the foundation for defining quality objectives and achieving the expected outcomes. The main instrument for implementing the Quality Policy is the Quality Assurance Department operating within BEU.

The strategic principles of the Quality Policy are as follows:

- Ensuring continuous improvement by focusing on the management and enhancement of educational processes.

- Implementing educational and administrative practices that ensure the satisfaction of students, parents, academic staff, other education employees, employers, professional organizations, and the public.

- Prioritizing human values in education to cultivate individuals who uphold national and ethical principles.

- Strengthening University–Industry cooperation and preparing a qualified workforce for the labor market.

- Conducting research aimed at addressing economic, cultural, and social challenges.

- Expanding distance education and lifelong learning opportunities.

- Actively participating in international exchange and student mobility programs.

- Accelerating adaptation to the Bologna Process and fostering integration into the European Higher Education Area.
